

**Authenticity.
Passion.
Success.**

Lynker delivers innovative solutions to support global environmental security and economic prosperity as a trusted partner to governments, communities, and industry. We are a premier science, engineering, and technology company supporting some of the nation's most important missions.

Weather and Climate Science

We support the operation, improvement, and delivery of weather forecasts. Our team of experts is advancing day-to-day weather prediction and protecting the most vulnerable communities from natural disasters.

Hydroclimatological Science and Analytics

Lynker is committed to developing innovative solutions to water resource problems and challenges for governments, industries, and communities. We create forward-thinking solutions to manage, forecast, and control our most valuable natural resource.

Systems Integration & Information Technology

We integrate advanced technologies to create customer-driven IT systems that transform data into accessible, actionable information.

Marine/Coastal Science

We create and deliver innovative services, tools, and products that promote the livability of our hydrosphere.

Environmental Policy & Compliance

Lynker understands the complex and interconnected environmental regulatory compliance landscape for developing and implementing a wide range of activities.

Training, Communications, Education, and Outreach

Lynker develops targeted messages and communications, outreach, and education products to reach a wide range of target audiences.
